

RORC V6 Point of Sale

- Complete Point of Sale and Price Management Solution
- AG has offered RORC to our retailers since 1985
- Price Management
- Tiered Pricing
- Management Reporting
- Sales and Movement History Reporting and Exports
- Financial information exports for use in other systems
- DSD, A/R, In-house charge, and all options included
- Tier 1 device support – Datalogic, Epson, NCR, APG, Hypercom, Dell and more.
- Nielsen and IRI interfaceCompatible with both Bartender and Design R Labels Label Printing Software

Easily Manage Financials, Products, & People

RORCV6 adapts to the retailer's operation yet provides inherent operational best practices. Settlement processes range from simple media counting to detailed tracking and reporting of cashiers, office, safe, and total store. Tracking of Accounts Receivable is integrated into office management so that all applied funds are fully accountable.

True terminal and cashier accountability allow for tracking people statistics (productivity, sales, etc.) and over/short by accountability type (till or cashier).

Key Backoffice Features Include:

- Robust Premium & Discount Management
- Office and Safe Accountability
- Integration of Banker Money Counter
- Full Accounts Receivable Management
- Configurable Reporting
- Receipt Management by Terminal
- Role Based Security
- Cashier Monitoring
- Exporting of Financial and Product Data
- Easy to Configure & Deploy

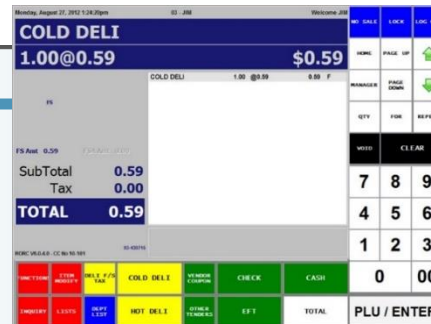

Flexible Reporting

Customizable sales reporting and a detailed Weekly Cash Report that can be printed or downloaded provide detailed tracking by day of the store operation. All reports are delivered in PDF format for easy portability.

Full Feature POS Application

RORCV6's POS fully utilizes DPOS for device connectivity which makes it compatible with many devices including hand scanners, scanner/scales, printers, and cash drawers. In addition, integrated payment logic is included with the application which when coupled with WinEPS or ServerEPS allows for a fully PCI compliant solution. In addition, the system has been certified for both Online and Offline WIC.

The system supports both small and large store environments ranging in size from 2 to 30+ lanes.

Key POS Features Include:

- Intuitive Cashier Interface
- Integrated Payments
- Configurable Pick Lists, Keyboards, Receipts, Touch Screens, & Manager Overrides
- User & Saleable Defined Media
- Cashier and Customer Displays
- Supports Coin Dispensers
- Unlimited Tax Plans
- Advertising Windows and Screen Savers
- Cashier Monitoring
- NCR Self-Checkout Interface
- Stand-alone Operations
- Simplified 24-hour Operations
- Cashier and Terminal Accountability
- In-lane Loans and Pickup
- RSS & GS-1 Capabilities
- Security by Terminal Group
- Supports DPOS Compatible Devices

LOC Software

- Complete Point of Sale Solution
- Multi Store Host capabilities
- Integrated Label Printing
- Integrated native credit card processing software
- Create Purchase Orders for Vendors
- Supports AG Host Communications offerings

Host Communications

- AG creates daily and weekly files that you can use to electronically update Prices, TPRS, Sale Prices, Costs, and Deals.
- First Time Buy files are created daily and add items you purchase from AG for the first time to your POS system.
- Separate TPR and AD File Pricing Available

Price Hosting – 3rd Party Register Systems

For customers using a system other than RORC, BRData, or LOC, Retail Systems can provide all the files necessary to update the retailer's costs and retails, including TPR and Ad retails as well as first time buy items. Daily and weekly files are downloaded to the retailer's computer and the customer's register dealer is responsible for importing the files into the POS system. There is a weekly fee associated with this feature. For more information, please email RetailSystems@agbr.com.

POS Price Comparisons

Associated Grocers has a few processes that will allow us to compare our retailer's current retails with those in the price book. For any exceptions found, tags, signs, and a host file can be generated to correct the issues. There is a fee associated with this service. For more information, please contact RetailSystems@agbr.com.

NCR Connected Payments

- Secure, hosted, offsite, eft payment software – ServerEPS
- No customer data is ever stored on store systems with ServerEPS
- Communicates directly with First Data and other major processors.

Network Security

- Centralized Firewall Management
- Firewall Logging
- Firewall Monitoring 24x7
- Firewall Policy Templates
- Intrusion Detection and Prevention Services
- Network Segmentation
- Security Policy Management
- Remote Installation Services
- Security Policy Management
- URL Filtering
- URL White Listing

Sign and Label Printing Software

- Bartender – Support for RORC and BRdata
- Design R Labels – Support for RORC, Brdata, LOC

Handheld Wireless Computers.

- DSD Receiving
- Shelf Audits
- Inventory
- Label Printing

- **DELL and NCR**

- Touch Screens
